

The team

by SuperBonBon

1. Who are we ?

1.1. DiSToAGe :

He plays with bits and bytes. He mixes them, makes them travel and attempts to make them fly (Editor's note : kids, stay away from drugs). Sometimes, he even wants to put a bit in a byte, or the opposite, and compresses them until one or both break

1.2. SuperBonBon:

He started to play King's Quest 1 a long time ago, and has never left his computer since. However [SuperBonBon](#)'s search has evolved and transformed into a new quest to master software architecture, open source software and is constantly on the look for new free toys to build.

1.3. SuperPraline :

Most of the time, I do not suck a lot of (Super)BonBons. And the rest of the time I do not suck bonbons at all.
